

Q-PRO

Asset Management Insights

Q-Pro is a modular solution to support and improve your Asset Management business processes.

Quasset

Quasset offers knowledge, smart tools and solutions to support and improve Asset Management in public infrastructure and the petrochemical industry.

Asset Management

Aging infrastructure and increasing cost awareness is challenging owners and managers of public infrastructures (such as water networks, roads and rails) to optimize their asset utilization and maximize the asset value. This requires a robust, information driven Asset Management approach.

Q-Pro offers

- Integrated asset information from multiple sources
- Easy navigation through maps and 3D models
- Mobile inspection data capture
- Risk modelling and analysis
- Investment and performance forecasting
- Powerful Asset Business Intelligence

Streamlined Asset and Inspection Data Collection

Q-Pro Mobile helps you capture asset and inspection data with improved efficiency and quality. You can easily capture data through workflow-based form, including pictures, videos, inspection measurement data, etc.

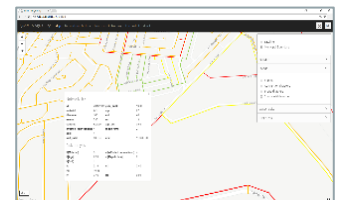

Integrated information access

Q-Pro offers integrated access to all the relevant information to support your asset management decisions. Maps and 3D provide easy navigation.

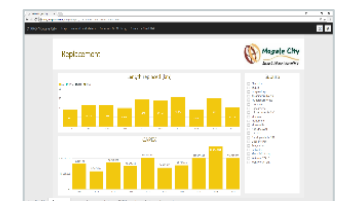

Streamlined Risk Analysis

Together with your team's experts we define and provide risk models that are tailored to your assets and business objectives. We can incorporate existing failure data, deterioration models and contextual information to provide the full picture.

Asset Forecasting

Q-Pro's risk analysis informs risk-based asset interventions, such as maintenance and replacements. This allows organizations to explore multiple intervention scenarios and explore long-term development of KPIs and CAPEX and OPEX needs.

Streamlined Asset Reporting

Interactive Business Intelligence dashboards and automatically generated PDF reports allow you to effectively share and communicate asset insights provided by asset data, risk analysis and forecasts
